KUMAR AYUSH AMBSTHA

Data Analyst · Business Intelligence (BI) Analyst · Analytics Engineer

Delhi, India • +91-9102853155 • ayushkumar.281299@gmail.com • linkedin.com/in/ayush-ambstha • github.com/ayush25-28

PROFESSIONAL SUMMARY

Analytical **MCA Graduate** with hands-on corporate experience in **CRM Pipeline Analytics, Automated Data Ingestion Pipelines, and Advanced SQL Querying**. Proficient in engineering end-to-end data workflows: extracting raw API data into PostgreSQL databases, building Star Schema models, and authoring executive Power BI dashboards with advanced DAX measures. Proven track record of improving onboarding pipeline velocity by **25%** at Abroad Pathway, automating recurring MIS KPI reporting, and training applied machine learning classification models.

TECHNICAL & ANALYTICAL SKILLS

Databases & Enterprise SQL: PostgreSQL, MySQL, Window Functions (ROW_NUMBER, DENSE_RANK, LEAD/LAG), CTEs, Complex Joins, Query Tuning (EXPLAIN ANALYZE), Relational Modeling (3NF)
BI & Visualization: Power BI (Star Schema Modeling, DAX Measures, CALCULATE, Time Intelligence, Slicers, Tooltips), Tableau, Excel PivotCharts, Seaborn, Matplotlib
Advanced Spreadsheets & MIS: Excel (Power Query M-code, Dynamic PivotTables, XLOOKUP, INDEX+MATCH, SUMIFS, Conditional Formatting, Data Validation, What-If Analysis)
Data Ingestion & Programming: Python (Pandas, NumPy, SQLAlchemy, Requests), REST API Data Ingestion, Automated ETL Pipelines, JSON Parsing, Git/GitHub
Analytics Thinking & Applied ML: Customer Churn Modeling, A/B Testing, Hypothesis Testing (T-tests, ANOVA), Outlier Detection (IQR/Z-Score), Scikit-Learn (Random Forest, Logistic Regression, SHAP)

PROFESSIONAL EXPERIENCE

Abroad Pathway Immigration Consultant Pvt. Ltd. – **Client Relationship & Data Operations Manager** **Aug 2026 – Present | Delhi NCR, India**

- Manage end-to-end CRM lifecycle data and conversion tracking across 50+ enterprise accounts, establishing structured data validation and auditing protocols.
- Conducted funnel drop-off analysis using Advanced Excel (PivotTables, dynamic lookups) and SQL, identifying operational bottlenecks and increasing conversion velocity by **25%**.
- Constructed weekly and monthly MIS KPI dashboards tracking lead aging, stage progression, and compliance scores, saving ~5 hours of manual reporting weekly.
- Partnered with cross-functional legal and client teams to synthesize statutory eligibility criteria into transparent data roadmaps, maintaining a **90%+ retention rate**.

Innovexis Pvt. Ltd. – **AI/ML & Data Intern** **Feb 2026 – Aug 2026 | Mumbai / Hybrid, India**

- Conducted exploratory data analysis (EDA), data imputation, and statistical outlier treatment across structured tabular datasets using Python (Pandas, NumPy).
- Engineered feature transformation pipelines (scaling, one-hot encoding, target binning) to prepare high-integrity training and cross-validation datasets.
- Benchmarked supervised classification models against quantitative business evaluation metrics (Precision, Recall, F1-Score, ROC-AUC) to reduce false-positive rates.

Deloitte (via Forage) – **Data Analytics Job Simulation** **2026 | Remote**

- Audited corporate transaction logs for fiscal discrepancies and anomalies, adopting Deloitte's forensic data analytics methodology.
- Built interactive Tableau and Excel dashboards translating raw governance and compliance indicators into clear executive-level recommendations.

KEY ANALYTICS & DATA ENGINEERING PROJECTS

Automated REST API Data Extraction & ETL Warehouse Pipeline | *GitHub: automated-data-pipeline* **Python, Requests, PostgreSQL, SQLAlchemy, Pandas**

- Engineered an automated end-to-end Python ETL pipeline ingesting paginated JSON payloads from live REST endpoints, eliminating manual CSV exports.
- Implemented automated schema validation, type casting, and statistical null imputation in Pandas; loaded clean records into a PostgreSQL warehouse using SQLAlchemy.
- Configured automated error handling, exponential backoff for HTTP rate limits, and scheduled daily script execution to maintain 99%+ pipeline reliability.

Enterprise Customer Lifecycle & Revenue Analytics Engine | *GitHub: enterprise-sql-engine* **PostgreSQL, SQL Window Functions, CTEs, Indexing**

- Architected a 3NF relational database schema in PostgreSQL; authored optimized multi-table JOINs and chained Common Table Expressions (CTEs) for cohort retention.
- Applied advanced Window Functions (`ROW_NUMBER()`, `DENSE_RANK()`, `LAG()`) to compute user purchase velocity, running totals, and MoM revenue growth.
- Analyzed query execution plans via `EXPLAIN ANALYZE`; constructed B-Tree composite indexes, reducing analytical query execution runtime by **85%**.

Executive Business Intelligence & Cohort Analytics Suite | *GitHub: powerbi-executive-suite* **Power BI, Power Query M, Star Schema, Advanced DAX**

- Designed a 3-tab executive dashboard modeling a Star Schema (1 Fact table, 4 Dimension tables) with a dedicated date dimension table for time intelligence.
- Authored 15+ complex DAX measures leveraging `CALCULATE()`, `ALL()`, and time intelligence to evaluate Customer Lifetime Value (LTV), YTD sales, and YoY growth.

Customer Churn Predictive Intelligence & Natural Language Query Portal | *GitHub: churn-ai-portal* **Python, Scikit-Learn, SHAP, Streamlit, LLM APIs**

- Trained an ensemble Random Forest classifier on imbalanced customer behavior logs using SMOTE; identified key churn drivers using SHAP TreeExplainer waterfall plots.
- Built an interactive Streamlit application integrating executive KPI cards, churn probability scores, and a conversational Text-to-SQL query assistant.

EDUCATION & CERTIFICATIONS

Master of Computer Applications (MCA) – Graphic Era Deemed to be University, Dehradun **CGPA: 7.46 / 10 | Graduated: June 2026**
Bachelor of Computer Applications (BCA) – Magadh University, Bihar **Score: 70% | Graduated: June 2023**
Professional Certifications: SQL Skills Certification (HackerRank) • Advanced Excel & Business Analytics (Udemy) • Forensic Data Analytics (Deloitte / Forage) • AI/ML Specialist (Innovexis)
